Each additional family member, add	5,408	451	104	7,696	642	148

Calculating Household Income

- If there is only one source of income or if all sources are received in the same frequency, no conversion is required.
- If there are multiple income sources with more than one pay frequency, the LEA must annualize all income using the following guidelines:
 - Weekly income multiplied by 52 weeks
 - Bi-weekly income (received every two weeks) multiplied by 26
 - Semi-monthly income (received twice a month) multiplied by 24
 - Monthly income multiplied by 12
- Do not round the values resulting from each conversion.
- Add all of the un-rounded converted values and compare the un-rounded total to the appropriate IEG for annual income for the household size.
