

COVID-19 Communication Update

March 9, 2020

Dear parents, teachers, and school administrators,

I wanted to take the opportunity to provide you with an update of our actions to address concerns surrounding COVID-19 and the sanitization of our school buses. The safety of the children we transport is our greatest concern. As such, we mobilized a quick response team to sanitize all the school buses which serve your district. We are pleased to say that due to the amazing team of dedicated employees, who worked around the clock this weekend to make this a reality, we successfully completed the objective. Additionally, we will continue to rotate buses through cleaning and sanitization stations to reduce the spread of this and other flu-related illnesses.

We are actively monitoring developments to the situation and will continue to take all necessary measures to provide safe and reliable transportation. If we can provide any other assistance to the district, please let me know. We are one community and here to help.

Sincerely,

Christine Valcourt

Vice President of Operations
