

The PARCC Field Test

What can my child expect?

PARCC is a computer-based test that will assess the state's new academic learning standards.

The field test lets schools and students experience PARCC in a low-stakes environment. If your child was selected for PARCC, your child will take an English language arts or mathematics test. Your child will not receive a score or grade based on his/her performance on the field test. If your child's class was selected by DESE to take the online PARCC Field Test, parents will be notified by a letter sent home by the school principal.
